

Terms and Conditions

Greehey Children's Cancer Research Institute (GCCRI)'s Genome Sequencing Facility (GSF) operations are supported by extra-mural grants (NIH, CPRIT & foundations) and institutional resources enabling substantial subsidization of charge-back rates. Continued grant and institutional funding is essential and highly dependent on documentation of facility support of publications by its users.

Acknowledgement of Genome Sequencing Facility

Research Facilities are under increasing pressure to demonstrate their value in the academic enterprise. A visible measure of the impact of core facilities is the number of Facility-contributed publications. Thus, proper acknowledgement of these contributions in publications and in grant proposals is essential for their continued support.

The facility should be listed in the "Acknowledgements" section of any publication using data generated in the Genome Sequencing Facility as follows:

Data was generated in the Genome Sequencing Facility which is supported by UT Health San Antonio, NIH-NCI P30 CA054174 (Cancer Center at UT Health San Antonio), NIH Shared Instrument grant 1S10OD021805-01 (S10 grant), and CPRIT Core Facility Award (RP160732).

Co-authorship

Facility Director(s) and personnel are scientists. The GSF promotes active collaboration on concrete and sustainable research activities that are of mutual benefit to GSF long term success and our NGS user. In addition to acknowledgements required of all publications, when the facility provides significant intellectual input for a project, the **Principal Investigator** who used the facility is expected to seek input from the Core Director(s) on preparation of manuscripts and to negotiate, at that time, co-authorship for key contributing core personnel. Please utilize the [Recommended Guidelines for Authorship on Manuscripts](#) outlined by the Association of Biomolecular Resource Facilities (ABRF). Ultimately, the decision of co-authorship or acknowledgement is up to the senior author (or PI) on the publication.

I acknowledge and accept the terms and conditions:

Printed name of Principal Investigator

Signature of Principal Investigator

Date
